

Question:

Janet’s ducks lay 16 eggs per day. She eats three for breakfast every morning and bakes muffins for her friends every day with four. She sells the remainder at the farmers' market daily for \$2 per fresh duck egg. How much in dollars does she make every day at the farmers' market?

Reasoning + Answer:

<think>

If Janet eats 3 eggs for breakfast every day , that's 3 eggs/day .

She bakes muffins for her friends every day with 4 eggs , so that's 4 eggs/day .

She lays 16 eggs per day , so $16 - (3 + 4) = 16 - 7 = 9$ eggs remain each day .

Since each egg is sold for \$2 , she makes $9 * \$2 = \18 per day at the farmers ' market .

</think>

<answer> \$18 </answer>
