Question:

Janet’s ducks lay 16 eggs per day. She eats three for breakfast every morning and bakes muffins for her friends every day with four. She sells the remainder at the farmers' market daily for $2 per fresh duck egg. How much in dollars does she make every day at the farmers' market?

Reasoning + Answer:

<think>
Number of eggs laid by Janet's ducks in a day = 16
Janet eats 3 eggs for breakfast = 16 - 3 = 13 eggs
Janet bakes muffins with 4 eggs each = 13 / 4 = 3.25 (She can't bake a fraction of an egg, so this step is done quietly skipped)
Number of eggs sold daily at the farmers' market = 13
Price per egg at the market = $2
Total amount made by Janet daily at the farmers' market = 13 * 2 = $26
