

Question:

Josh decides to try flipping a house. He buys a house for \$80,000 and then puts in \$50,000 in repairs. This increased the value of the house by 150%. How much profit did he make?

Reasoning + Answer:

<think>

The value of the house increased by 150 % of \$ 80 , 000 , which is $80,000 \times 1.5 = 120,000$

The total value of the house is $80,000 + 120,000 = 200,000$

He invested a total of $80,000 + 50,000 = 130,000$

Profit = Total value - Investment = $200,000 - 130,000 = 70,000$

</think>

<answer> 700 00 </answer>
