

Question:

James decides to run 3 sprints 3 times a week. He runs 60 meters each sprint. How many total meters does he run a week?

Reasoning + Answer:

<think>

Total meters run per sprint = 3 sprints * 60 meters = 180 meters

Total meters run per week = 180 meters * 3 = 540 meters

</think>

<answer> 540 </answer>
