

Question:

Janet’s ducks lay 16 eggs per day. She eats three for breakfast every morning and bakes muffins for her friends every day with four. She sells the remainder at the farmers' market daily for \$2 per fresh duck egg. How much in dollars does she make every day at the farmers' market?

Reasoning + Answer:

<think>
Janet’s ducks lay 16 eggs in a day , and she eats three every morning , so $16 - 3 = 13$ duck eggs .
Janet bakes muffins for her friends using 4 eggs every day , so she has $13 - 4 = 9$ duck eggs remaining .
Janet sells each fresh duck egg at the farmers ' market for \$2 per egg , so $9 \times \$2 = \18 in total in the daily earnings .
</think>
<answer>
18
</answer>
