

Question:

James decides to run 3 sprints 3 times a week. He runs 60 meters each sprint. How many total meters does he run a week?

Reasoning + Answer:

<think>
He runs 60 meters per sprint for 3 sprints making $60 * 3 = 180$ meters
He runs 3 times a week so he runs $180 * 3 = 540$ meters in total
</think>
<answer>
540
</answer>
