

Question:

Janet’s ducks lay 16 eggs per day. She eats three for breakfast every morning and bakes muffins for her friends every day with four. She sells the remainder at the farmers' market daily for \$2 per fresh duck egg. How much in dollars does she make every day at the farmers' market?

Reasoning + Answer:

<think>
Janet has 16 eggs in the morning - 3 that she eats for breakfast = 13 eggs that she has left.
Janet bakes muffins with 4 eggs each, so she uses $4 * 4 = 16$ eggs.
Janet has 13 eggs - 16 that she uses in muffins = $13 - 16 = -3$ eggs remaining.
Since there are 24 hours in a day, she will sell $3 * 24 = 72$ eggs per day
Janet sells each egg for \$2, so she makes $72 * \$2 = \144 in duck eggs every day
</think>
<answer>
144
</answer>
