

Question:

Janet’s ducks lay 16 eggs per day. She eats three for breakfast every morning and bakes muffins for her friends every day with four. She sells the remainder at the farmers' market daily for \$2 per fresh duck egg. How much in dollars does she make every day at the farmers' market?

Reasoning + Answer:

<think>

Jan et eats 3 eggs and bakes 4 eggs as muffins every morning , so she uses $3 + 4 = 7$ eggs .

Her ducks lay 16 eggs , and she uses 7 , so she has $16 - 7 = 9$ eggs left to sell .

She sells the 9 eggs for \$2 each , so she makes $9 * 2 = \$18$ every day at the farmers' market .

</think>

<answer>

18

</answer>
