

Question:

John drives for 3 hours at a speed of 60 mph and then turns around because he realizes he forgot something very important at home. He tries to get home in 4 hours but spends the first 2 hours in standstill traffic. He spends the next half-hour driving at a speed of 30mph, before being able to drive the remaining time of the 4 hours going at 80 mph. How far is he from home at the end of those 4 hours?

Reasoning + Answer:

<think>
He drove 3 hours * 60 mph = 180 miles away from home .
He was stuck for 2 hours , then drove 0 . 5 hours * 30 mph = 15 miles .
He had 4 hours - 2 hours - 0 . 5 hours - 3 hours = - 0 . 5 hours remaining to get home .
He drove for - 0 . 5 hours * 80 mph = 40 miles .
He is 180 - 15 + 40 = 205 miles from home .
</think>
<answer>
205
</answer>
