

Question:

Janet’s ducks lay 16 eggs per day. She eats three for breakfast every morning and bakes muffins for her friends every day with four. She sells the remainder at the farmers' market daily for \$2 per fresh duck egg. How much in dollars does she make every day at the farmers' market?

Reasoning + Answer:

<think>
She uses 3 eggs for breakfast and bakes 4 eggs in a day for friends . That is a total of $3 + 4 = 7$ eggs used per day .
The rest of the eggs would be $16 - 7 = 9$ fresh eggs .
At \$2 per egg she sells , she makes $9 * 2 = \$18$ at the market every day .
</think>
<answer>
18
</answer>
