

Question:

A robe takes 2 bolts of blue fiber and half that much white fiber. How many bolts in total does it take?

Reasoning + Answer:

<think>

One quarter of 2 bolts is $2 / 4 = 1 / 2$ bolt

Thus, $2 + 1 / 2 = 2 \frac{1}{2}$ bolts are needed.

</think>

<answer>

2.5

</answer>
