

Question:

A robe takes 2 bolts of blue fiber and half that much white fiber. How many bolts in total does it take?

Reasoning + Answer:

<think> <think>the robe takes <think>2</think> bolts of blue fiber <think>and half that much white fiber means half of the blue fiber which is 1 so the robe takes <think>1</think> bolt of white fiber <think>together the robe needs 2 bolts for blue + 1 bolt for white which is a total of <think>3</think> bolts</think> </think> </think> <answer>3</answer> </think>
