

Question:

A robe takes 2 bolts of blue fiber and half that much white fiber. How many bolts in total does it take?

Reasoning + Answer:

<think>
A robe takes 2 bolts of blue fiber to make .
The robe needs half as much white fiber , so it would need <think>
 $2 / 2 = 1$ </think> bolt of white fiber .
Adding both types of fiber the robe needs in total is <think>
 $2 + 1 = 3$ </think> bolts .
</think>
<answer>
3 </answer>
