

Question:
Janet’s ducks lay 16 eggs per day. She eats three for breakfast every morning and bakes muffins for her friends every day with four. She sells the remainder at the farmers' market daily for \$2 per fresh duck egg. How much in dollars does she make every day at the farmers' market?

Reasoning + Answer:

<think>
the ducks lay 16 eggs per day
Janet eats 3 for breakfast every morning
the remaining laid eggs number : $16 - 3 = 13$
she bakes muffins for her friends using 4 of the remaining eggs
therefore , the fresh eggs for sale are $13 - 4$
hence , the number of fresh eggs for sale is $13 - 4 = 9$
she sells each fresh egg for \$2
therefore , her earnings is : $9 * 2$
therefore , her daily earnings at the market is $9 * 2 = 18$
</think>
<answer>
18 </answer>
