

Question:

Janet’s ducks lay 16 eggs per day. She eats three for breakfast every morning and bakes muffins for her friends every day with four. She sells the remainder at the farmers' market daily for \$2 per fresh duck egg. How much in dollars does she make every day at the farmers' market?

Reasoning + Answer:

<think>
the number of eggs left after Janet has eaten 3 for breakfast is $16 - 3 = 13$.
the number of eggs which she sells is $13 - 4 = 9$.
she gets 2 dollars per egg so she gets $9 * 2 = 18$ dollars daily.
</think>
<answer>
18 </answer>
