

Question:

Janet’s ducks lay 16 eggs per day. She eats three for breakfast every morning and bakes muffins for her friends every day with four. She sells the remainder at the farmers' market daily for \$2 per fresh duck egg. How much in dollars does she make every day at the farmers' market?

Reasoning + Answer:

<think>

The ducks lay enough eggs each day to make $16 / 3 = 5$ and $1 / 3$ muffins

But she cannot sell $1 / 3$ of a muffin so she only makes a living by selling the remainder of eggs after she makes the muffins which is $16 - 5 = 11$ eggs

She makes \$2 for each egg sold and sells 11 eggs each day for a total of $2 * 11 = \$22$ per day

</think>

<answer>

22

</answer>
