

Question:

James decides to run 3 sprints 3 times a week. He runs 60 meters each sprint. How many total meters does he run a week?

Reasoning + Answer:

<think>
he runs 3 * 60
3 * 60 = 180
so he runs 180 meters per week daycare
he runs 3 times a week 1 1/2 x
so he runs 180 * 3
180 * 3 = 540 }></severity hendis
