Question:
Kylar went to the store to buy glasses for his new apartment. One glass costs $5, but every second glass costs only 60% of the price. Kylar wants to buy 16 glasses. How much does he need to pay for them?

Reasoning + Answer:

<think>
the price of one glass is $5
every second glass costs 60% of the price of one glass, which is 5 * 0.6 = 3 dollars
so, the glasses Kylar needs to buy will be 16, which are not tho extensions or packages or comm
