

Question:

A robe takes 2 bolts of blue fiber and half that much white fiber. How many bolts in total does it take?

Reasoning + Answer:

<think>To start with, the robe needs 2 bolts of blue fiber. It needs half that much white fiber, so it needs $2 / 2 = 1$ bolt of white fiber.

To find out the total number of bolts, we need to add the blue fiber and white fiber together: $2 + 1 = 3$.

Therefore, it needs 3 bolts in total.</think>

<answer>3</answer>
