

Question:

Josh decides to try flipping a house. He buys a house for \$80,000 and then puts in \$50,000 in repairs. This increased the value of the house by 150%. How much profit did he make?

Reasoning + Answer:

<think>
original price \$80000
he added \$50000 on the house
so the total value Josh then added is $\$80000 + \$50000 = \$130000$.
the value of the house increased by 150% of 80000
that's $130000 - 80000 = 50000$.
Josh made profit of 50000.
</think>
<answer>
50000 </answer>
