

Question:

Jill gets paid \$20 per hour to teach and \$30 to be a cheerleading coach. If she works 50 weeks a year, 35 hours a week as a teacher and 15 hours a week as a coach, what's her annual salary?

Reasoning + Answer:

<thinking process >

Step 1 : Calculate Jill's weekly income as a teacher .

She earns \$ 2 0 per hour and works 3 5 hours per week as a teacher .

So , weekly teacher income = 2 0 dollars/h our Ã 3 5 hours = 7 0 0 dollars per week .

Step 2 : Calculate Jill's weekly income as a cheerleading coach .

She earns \$ 3 0 per hour and works 1 5 hours per week as a coach .

So , weekly coach income = 3 0 dollars/h our Ã 1 5 hours = 4 5 0 dollars per week .

Step 3 : Total weekly income = teacher income + coach income

Total weekly income = 7 0 0 + 4 5 0 = 1 1 5 0 dollars per week .

Step 4 : Calculate annual salary .

She works 5 0 weeks a year .

Annual salary = Total weekly income Ã 5 0 weeks = 1 1 5 0 Ã 5 0 .

Now compute 1 1 5 0 Ã 5 0 :

1 1 5 0 Ã 5 0 = (1 1 5 0 Ã 5) Ã 1 0 = (5 7 , 5 0 0) Ã 1 0 = 5 7 , 5 0 0 .

So , her annual salary is \$ 5 7 , 5 0 0 .

</thinking process >

< answer > 5 7 5 0 0 </answer >
