

Question:

James decides to run 3 sprints 3 times a week. He runs 60 meters each sprint. How many total meters does he run a week?

Reasoning + Answer:

We are given :

- James runs **3 sprints** each day .
- Each sprint is **60 meters** .
- He does this **3 times a week** .

We need to find the total meters he runs in a week .

Step 1 : Calculate meters per day

Each day , he runs :

\$\$

$$3 \text{ sprints} \times 60 \text{ meters} = 180 \text{ meters}$$

\$\$

Step 2 : Calculate total meters per week

He runs this 3 days a week :

\$\$

$$180 \text{ meters/day} \times 3 \text{ days} = 540 \text{ meters}$$

\$\$

â€™ Final Answer :

< answer > 540 </ answer >
