

Question:

Janet’s ducks lay 16 eggs per day. She eats three for breakfast every morning and bakes muffins for her friends every day with four. She sells the remainder at the farmers' market daily for \$2 per fresh duck egg. How much in dollars does she make every day at the farmers' market?

Reasoning + Answer:

<think>
Jan et eats 3 eggs and makes muffins with 4 eggs every day , so she uses $3 + 4 = 7$ eggs per day
She collects 16 eggs a day and uses 7 , so that leaves $16 - 7 = 9$ eggs per day
She sells her eggs at \$2 apiece , so she makes $9 * 2 = \$18$ per day at the farmers ' market
</think>
<answer>
18
