

Question:

Josh decides to try flipping a house. He buys a house for \$80,000 and then puts in \$50,000 in repairs. This increased the value of the house by 150%. How much profit did he make?

Reasoning + Answer:

<think>

He invested $80000 + 50000 = \$130,000$ into the house

It was worth $80000 * 2.5 = \$200,000$ after the remodel

So he made a $200,000 - 130,000 = \$70,000$ profit

</think>

<answer>

70000
