

Question:

A robe takes 2 bolts of blue fiber and half that much white fiber. How many bolts in total does it take?

Reasoning + Answer:

<think>
A bolt of blue takes $2 * 3 = 6$ units of white fiber.
So that means it takes $6 / 2 = 3$ units of white fiber.
So the bolt takes $6 + 3 = 9$ units of fiber to make.
</think>
<answer>
9
</answer>
