

**Question:**

Josh decides to try flipping a house. He buys a house for \$80,000 and then puts in \$50,000 in repairs. This increased the value of the house by 150%. How much profit did he make?

**Reasoning + Answer:**

<think>  
After repairs, the house is now worth  $150/100 * 80000 + \$80,000 = \$280,000$   
So he makes a profit of  $\$280,000 - \$50,000 - \$80,000 = \$150,000$   
</think>  
<answer>  
150000  
</answer>
