

Question:

Josh decides to try flipping a house. He buys a house for \$80,000 and then puts in \$50,000 in repairs. This increased the value of the house by 150%. How much profit did he make?

Reasoning + Answer:

<think>

The repairs added $150\% * 80,000 = \$120,000$ to the house.

So the house was sold for $120,000 + 80,000 = \$200,000$.

So he made a profit of $200,000 - 80,000 - 50,000 = \$70,000$.

</think>

<answer>

70000

</answer>
