

Question:

What are the minimum and maximum possible values of Glasgow Coma Score?

Answer Choices:

- A. Minimum = 3, Maximum = 15
- B. Minimum = 0, Maximum = 13
- C. Minimum = 0, Maximum = 15
- D. Minimum = 3, Maximum = 18

Reasoning + Answer:

<think>
Finding Reasoning Paths :
1 . **Understanding the Glasgow Coma Scale (GCS):** Analyze the structure of the GCS , which assesses three components : eye response , verbal response , and motor response , and determine the minimum and maximum possible scores based on the scales provided for each component .
2 . **Eye Response:** Evaluate the possible scores for eye response (ranging from 1 to 4) and determine the minimum and maximum totals .
3 . **Verbal Response:** Assess the possible scores for verbal response (ranging from 1 to 5) and determine the minimum and maximum totals .
4 . **Motor Response:** Evaluate the possible scores for motor response (ranging from 1 to 6) and determine the minimum and maximum totals .
5 . **Combining Scores:** Sum the minimum and maximum scores from each component to find the overall minimum and maximum GCS values .

Reasoning Process :
1 . **Eye Response:** The GCS assigns scores for eye response as follows :
- **4:** Spontaneous eye opening .
- **3:** To voice .
- **2:** To pain .
- **1:** No response .
The minimum score for eye response is **1** (no response), and the maximum score is **4** (spontaneous opening).

2 . **Verbal Response:** The GCS assigns scores for verbal response as follows :
- **5:** Oriented .
- **4:** Confused conversation .
- **3:** In appropriate words .
- **2:** In comprehensible sounds .
- **1:** No response .
The minimum score for verbal response is **1** (no response), and the maximum score is **5** (oriented).

3 . **Motor Response:** The GCS assigns scores for motor response as follows :
- **6:** Obeys commands .
- **5:** Localizes pain .
- **4:** Withdraws to pain .
- **3:** Flexion response to pain .
- **2:** Extensor response to pain .
- **1:** No response .
The minimum score for motor response is **1** (no response), and the maximum score is **6** (obeys commands).

4 . **Combining Scores:**
- The minimum total score is the sum of the minimum scores for each component : $\backslash (1 (\text{eye}) + 1 (\text{verbal}) + 1 (\text{motor}) = 3 \backslash)$.
- The maximum total score is the sum of the maximum scores for each component : $\backslash (4 (\text{eye}) + 5 (\text{verbal}) + 6 (\text{motor}) = 15 \backslash)$.

Conclusion :
The minimum possible value of the Glasgow Coma Scale is **3**, and the maximum possible value is **15** .
</think>
<answer>
Minimum = 3 , Maximum = 15
</answer>
