

Question:

What are the minimum and maximum possible values of Glasgow Coma Score?

Answer Choices:

- A. Minimum = 3, Maximum = 15
- B. Minimum = 0, Maximum = 13
- C. Minimum = 0, Maximum = 15
- D. Minimum = 3, Maximum = 18

Reasoning + Answer:

<think> I am thinking about the Glasgow Coma Score . The Glasgow Coma Score is a neurological scale used to assess the level of consciousness in a person . It is calculated by adding the scores of three components : eye opening , verbal response , and motor response . Each component has a score ranging from 1 to 4 , depending on the level of consciousness . The total score ranges from 3 to 15 . </think><answer> A . Minimum = 3 , Maximum = 15 </answer>
