

Question:

What are the minimum and maximum possible values of Glasgow Coma Score?

Answer Choices:

- A. Minimum = 3, Maximum = 15
- B. Minimum = 0, Maximum = 13
- C. Minimum = 0, Maximum = 15
- D. Minimum = 3, Maximum = 18

Reasoning + Answer:

<think>
To determine the minimum and maximum possible values of the Glasgow Coma Score , we need to consider the components of the score , which include eye opening , verbal response , and motor response . The score is calculated by adding the scores of each component , with a maximum score of 4 for each . The minimum score for each component is 1 , and the maximum is 4 . Therefore , the minimum overall score would be 1 (for eye opening) + 1 (for verbal response) + 1 (for motor response) = 3 . The maximum overall score would be 4 (for eye opening) + 4 (for verbal response) + 4 (for motor response) = 12 . However , one reference scores .Context

</think><answer> B . Minimum = 0 , Maximum = 13
