

Question:

What are the minimum and maximum possible values of Glasgow Coma Score?

Answer Choices:

- A. Minimum = 3, Maximum = 15
- B. Minimum = 0, Maximum = 13
- C. Minimum = 0, Maximum = 15
- D. Minimum = 3, Maximum = 18

Reasoning + Answer:

<think>The Glasgow Coma Scale (GCS) scores a patient's responses to assess their level of consciousness. It has three components: eye opening, verbal response, and motor response, each scored from 1 to 6. The total score ranges from the lowest (most severe impairment) to the highest (full consciousness). The lowest possible score is 3 (1 + 1 + 1, indicating no response in all three categories) and the highest possible score is 15 (6 + 6 + 6, indicating a full response in all three categories). </think>

<answer>C. Minimum = 0, Maximum = 15</answer>
