

Question:

What are the minimum and maximum possible values of Glasgow Coma Score?

Answer Choices:

- A. Minimum = 3, Maximum = 15
- B. Minimum = 0, Maximum = 13
- C. Minimum = 0, Maximum = 15
- D. Minimum = 3, Maximum = 18

Reasoning + Answer:

<think>

Finding reasoning paths :

- 1 . The Glasgow Coma Scale (GCS) is a neuro logic scoring system that evaluates a patient's response to verbal stimuli , painful stimuli , and motor stimuli .
- 2 . The lowest score for motor response is 0 , which indicates no response to stimuli .
- 3 . The highest score for motor response is 6 , which indicates spontaneous withdrawal of limbs from painful stimuli .
- 4 . The lowest score for verbal response is 0 , which indicates no verbal response .
- 5 . The highest score for verbal response is 5 , which indicates full orientation to person , place , time , and situation .
- 6 . The lowest score for eye opening response is 1 , which indicates no response .
- 7 . The highest score for eye opening response is 4 , which indicates spontaneous eye opening .

Reasoning Process :

- 1 . The Glasgow Coma Scale (GCS) evaluates three aspects of a patient's neurological function : eye opening , verbal response , and motor response . The total score ranges from a minimum of 3 to a maximum of 15 .
- 2 . For motor response , the lowest score is 0 , indicating no response to painful stimuli , and the highest score is 6 , indicating spontaneous withdrawal of limbs from painful stimuli .
- 3 . For verbal response , the lowest score is 0 , indicating no verbal response , and the highest score is 5 , indicating full orientation to person , place , time , and situation .
- 4 . For eye opening , the lowest score is 1 , indicating no response , and the highest score is 4 , indicating spontaneous eye opening .
- 5 . The total GCS score is calculated by summing the scores from these three aspects . The minimum possible score , when all responses are at their lowest , is 3 (1 for eye opening , 0 for motor response , and 0 for verbal response). The maximum possible score , when all responses are at their highest , is 15 (4 for eye opening , 6 for motor response , and 5 for verbal response).

Conclusion :

The minimum possible value of the Glasgow Coma Score is 3 , and the maximum possible value is 15 . This aligns with the scoring criteria of the GCS , where the minimum score is 3 and the maximum score is 15 .

</think>

<answer>

Minimum = 3 , Maximum = 15

</answer>
