

Question:

At birth, the least developed part of the brain is the

Answer Choices:

- A. visual system
- B. thalamus
- C. frontal lobe
- D. brain stem
- E. parietal lobe
- F. cerebellum
- G. cortex
- H. basal ganglia
- I. hypothalamus
- J. limbic system

Reasoning + Answer:

<think>

- The brain at birth is largely immature .

- The cerebrum , especially the frontal lobe , is one of the last parts of the brain to develop .

- Other areas like the brain stem , cerebellum , and thalamus , while not fully mature , are more developed than the cerebral cortex at birth .

- The visual system , although present , is not fully functional at birth .

- The cortex , particularly the cerebral cortex , is the last major region of the brain to fully develop .

- Thus , the least developed part of the brain at birth among the given options is the cortex .

</think>

<answer>

G . cortex

</answer>
