

Question:
At birth, the least developed part of the brain is the

Answer Choices:

- A. visual system
- B. thalamus
- C. frontal lobe
- D. brain stem
- E. parietal lobe
- F. cerebellum
- G. cortex
- H. basal ganglia
- I. hypothalamus
- J. limbic system

Reasoning + Answer:

<think>

- The brain develops from the bottom up .
- The brain stem and spinal cord develop first .
- The cere brum , which includes the cortex , develops last .
- At birth , the brain stem and cere bell um are relatively more developed compared to the cortex .
- The cortex is the outer layer of the brain that is involved in complex brain functions such as memory , attention , thought , language , and consciousness , and it develops a lot after birth .
- Therefore , at birth , the least developed part of the brain is the cortex .
