

Question:

At birth, the least developed part of the brain is the

Answer Choices:

- A. visual system
- B. thalamus
- C. frontal lobe
- D. brain stem
- E. parietal lobe
- F. cerebellum
- G. cortex
- H. basal ganglia
- I. hypothalamus
- J. limbic system

Reasoning + Answer:

<think>
- The brain develops from the base to the top and from the back to the front .
- At birth , the brain stem is the first part to be fully developed , followed by the cere bell um , and then the cortex .
- The visual system , frontal lobe , parietal lobe , and other components like the cortex are the last to fully develop .
- Therefore , at birth , the least developed part of the brain is the visual system .

</think>
<answer>
A
</answer>
