

Question:

At birth, the least developed part of the brain is the

Answer Choices:

- A. visual system
- B. thalamus
- C. frontal lobe
- D. brain stem
- E. parietal lobe
- F. cerebellum
- G. cortex
- H. basal ganglia
- I. hypothalamus
- J. limbic system

Reasoning + Answer:

<think> At birth, the brain is not fully developed. The cerebral cortex, which is responsible for higher-order functions like perception, thought, and action, is among the last parts to develop. The thalamus, which is involved in sensory and motor signal traffic to and from the cerebral cortex, also undergoes significant development. However, compared to the other parts listed, the thalamus is among the earliest developed and more mature at birth. </think>

<answer> B. thalamus </answer>
