

Question:

James decides to run 3 sprints 3 times a week. He runs 60 meters each sprint. How many total meters does he run a week?

Reasoning + Answer:

<think>

If James runs 3 sprints 3 times a week, he runs a total of $3 \times 3 = 9$ sprints per week.

He runs 60 meters each sprint, so in a week he runs $9 \times 60 = 540$ meters.

</think><answer>540</answer>
