

Question:

Jill gets paid \$20 per hour to teach and \$30 to be a cheerleading coach. If she works 50 weeks a year, 35 hours a week as a teacher and 15 hours a week as a coach, what's her annual salary?

Reasoning + Answer:

<thinking process >

Step 1 : Calculate how much Jill earns as a teacher per year .

She earns \$ 2 0 per hour and teaches 3 5 hours per week .

She works 5 0 weeks per year .

So , her annual teaching income = 2 0 dollars/h our Ã 3 5 hours / week Ã 5 0 weeks/year .

Step 2 : Calculate how much Jill earns as a cheerleading coach per year .

She earns \$ 3 0 per hour and coaches 1 5 hours per week .

She also works 5 0 weeks per year .

So , her annual coaching income = 3 0 dollars/h our Ã 1 5 hours / week Ã 5 0 weeks/year .

Step 3 : Add both incomes to get her total annual salary .

Now , calculate the numbers :

Teaching income :

2 0 Ã 3 5 = 7 0 0 dollars per week

7 0 0 Ã 5 0 = 3 5 , 0 0 0 dollars per year .

Coaching income :

3 0 Ã 1 5 = 4 5 0 dollars per week

4 5 0 Ã 5 0 = 2 2 , 5 0 0 dollars per year .

Total annual salary = 3 5 , 0 0 0 + 2 2 , 5 0 0 = 5 7 , 5 0 0 dollars .

</thinking process >

< answer > 5 7 , 5 0 0 </answer >
