

Question:

Raymond and Samantha are cousins. Raymond was born 6 years before Samantha. Raymond had a son at the age of 23. If Samantha is now 31, how many years ago was Raymond's son born?

Reasoning + Answer:

We are given the following information :

- Raymond was born 6 years before Samantha .
- Raymond had a son at the age of 23 .
- Samantha is now 31 years old .
- We need to find out **how many years ago** Raymond's son was born .

Step 1 : Find Raymond’s current age

Since Samantha is 31 and Raymond was born 6 years before her , Raymond is now :

31 + 6 = 37 \text { years old }

Step 2 : When was Raymond's son born ?

Raymond had his son when he was 23 .

So , Raymond's son was born at age 23 :

37 - 23 = 14 \text { years ago }

∴ That means Raymond's son was born 14 years ago .

We can verify :

- Samantha is 31 now .
- Raymond is 37 now .
- He had his son at 23 ∴ son born at 37 - 23 = 14 years ago .

This is consistent .

< answer > 14 </ answer >
