

Question:

Janet’s ducks lay 16 eggs per day. She eats three for breakfast every morning and bakes muffins for her friends every day with four. She sells the remainder at the farmers' market daily for \$2 per fresh duck egg. How much in dollars does she make every day at the farmers' market?

Reasoning + Answer:

<think>
She eats 3 and uses 4 in her baking for a total of $3 + 4 = 7$ eggs
Her ducks lay 16 eggs and she eats 7 which leaves $16 - 7 = 9$ eggs to sell
She sells her 9 eggs for \$2 each so she makes $9 * 2 = \$18$
</think>
<answer>
18
</answer>
