

Question:

Josh decides to try flipping a house. He buys a house for \$80,000 and then puts in \$50,000 in repairs. This increased the value of the house by 150%. How much profit did he make?

Reasoning + Answer:

<think>
The repairs added $150\% * 80,000 = \$120,000$ to the house.
So the house was sold for $120,000 + 80,000 = \$200,000$.
So he made a profit of $200,000 - 80,000 - 50,000 = \$70,000$.
</think>
<answer>
70000
</answer>
