

Question:

Janet’s ducks lay 16 eggs per day. She eats three for breakfast every morning and bakes muffins for her friends every day with four. She sells the remainder at the farmers' market daily for \$2 per fresh duck egg. How much in dollars does she make every day at the farmers' market?

Reasoning + Answer:

<think>
She eats three eggs a day so the number of remaining eggs she has each day is $16 - 3 = 13$ eggs .
She bakes muffins with 4 eggs every day so she has $13 - 4 = 9$ eggs left every day .
The eggs are sold at \$2 per egg and she sells 9 daily so she has $9 * 2 = \$18$ per day .
</think>
<answer>
18
</answer>
