

Question:

Billy sells DVDs. He has 8 customers on Tuesday. His first 3 customers buy one DVD each. His next 2 customers buy 2 DVDs each. His last 3 customers don't buy any DVDs. How many DVDs did Billy sell on Tuesday?

Reasoning + Answer:

`<think>` Billy's first three customers buy three DVDs in total, and then the next two customers buy six DVDs. So that's 9 DVDs so far. Billy's last three customers bought no DVDs, so he sold 9 DVDs in total. `</think>` `<answer>` 9 `</answer>`
