

Question:

In a dance class of 20 students, 20% enrolled in contemporary dance, 25% of the remaining enrolled in jazz dance, and the rest enrolled in hip-hop dance. What percentage of the entire students enrolled in hip-hop dance?

Reasoning + Answer:

`<think>`Students enrolled in contemporary dance = 20% of $20 = 20 \times \frac{20}{100} = 4$.
Remaining students = $20 - 4 = 16$. Students enrolled in jazz dance = 25% of $16 = 16 \times \frac{25}{100} = 4$. Students enrolled in hip-hop dance = $16 - 4 = 12$. Percentage of students enrolled in hip-hop dance = $(12 / 20) \times 100 = 60$. `</think>`
`<answer>`60 `</answer>`
