

Question:

A candle melts by 2 centimeters every hour that it burns. How many centimeters shorter will a candle be after burning from 1:00 PM to 5:00 PM?

Reasoning + Answer:

<think>The candle burns for 4 hours, from 1 PM to 5 PM. The candle melts by 2 cm each hour. So, the total distance melted in 4 hours = $2 \times 4 = 8$ cm. The candle will melt by 8 cm.
<answer>8
