

Question:

A candle melts by 2 centimeters every hour that it burns. How many centimeters shorter will a candle be after burning from 1:00 PM to 5:00 PM?

Reasoning + Answer:

<think>The candle burns for 4 hours from 1:00 PM to 5:00 PM. The candle melts by 2 cm every hour, so the candle melts by $2 \text{ cm/hour} \times 4 \text{ hr} = 8 \text{ cm}$. After burning from 1:00 PM to 5:00 PM, the candle will be 8 cm shorter. </think><answer>8</answer>
