

Question:

Kylar went to the store to buy glasses for his new apartment. One glass costs \$5, but every second glass costs only 60% of the price. Kylar wants to buy 16 glasses. How much does he need to pay for them?

Reasoning + Answer:

<think>Kylar buys 16 glasses. Of those 16 glasses, the first 15 will cost $15 * 5 = 75$ dollars. Of the other 1 glass, he will need to pay $60\% * 5 = 3$ dollars. $75 + 3 =$ <<15 * 5 + 3 = 78>> 78 dollars </think><answer>78</answer>
