

Question:

Toula went to the bakery and bought various types of pastries. She bought 3 dozen donuts which cost \$68 per dozen, 2 dozen mini cupcakes which cost \$80 per dozen, and 6 dozen mini cheesecakes for \$55 per dozen. How much was the total cost?

Reasoning + Answer:

`<think>` Toula bought 3 dozen donuts which cost \$68 per dozen, so the donuts cost $3 \times 68 = 204$ \$total. She bought 2 dozen mini cupcakes which cost \$80 per dozen, so the cupcakes cost $2 \times 80 = 160$ \$total. Toula bought 6 dozen mini cheesecakes which cost \$55 per dozen, so the cheesecakes cost $6 \times 55 = 330$ \$total. So the total cost is $204 + 160 + 330 = 140$ `</think>` `<answer>`140 `</answer>`
