

Question:

A candle melts by 2 centimeters every hour that it burns. How many centimeters shorter will a candle be after burning from 1:00 PM to 5:00 PM?

Reasoning + Answer:

<think> There are five hours of burning from 1:00 PM to 5:00 PM. The candle melts by 2 centimeter every hour of burning. So it melts by $2 * 5 = 10$ centimeters between 1:00 PM and 5:00 PM. So the candle will be 10 centimeters shorter after burning from 1:00 PM to 5:00 PM. </think> <answer>10 </answer>
