

Question:

Toula went to the bakery and bought various types of pastries. She bought 3 dozen donuts which cost \$68 per dozen, 2 dozen mini cupcakes which cost \$80 per dozen, and 6 dozen mini cheesecakes for \$55 per dozen. How much was the total cost?

Reasoning + Answer:

<think>She bought 3dozendonutsandadozenis 12so she bought 3*12=36donuts. The donutscost\$68/dozenandshe bought 3dozensothetotalfor the donutswas\$68*3=\$204. Shebought 2dozenminicupcakesandadozenis 12so she bought 2*12=24minicupcakes. Theminicupcakescost\$80/dozenandshe bought 2dozensothetotalwas\$80*2=\$160. Shebought 6dozenminicheesecakesandshe bought 6*12=72minicheesecakes. Themini cheesecakescost\$55/dozenandshe bought 6dozensothetotalwas\$55*6=\$330. She bought 36donutsat\$204and 72minicheesecakesat\$330foratotalof\$204+\$330=\$534. Whensheaddsthe 24cupcakestothe 36donutsand 72cheesecakessheboughtshe got 24+36+72=132pastries. Thepastriescost\$534andshebought 132pastriesand 132/12=11dozenso shebought 11dozentotalpastries. Thepastriesintotalcost\$534and 11dozenat\$534/11=\$48.45perdozen </think><answer>534</answer>
